For over 40 years, Royal has been committed to designing products that reflect our standards of excellence while enhancing your home, and thus your neighborhood. Our quality products offer durable, low maintenance features that deliver lasting beauty and enduring value. We offer many color choices and options so you can pick the hues that make you happy. After all, your home is an outward reflection of you. And that's a great feeling to come home to year after year.

Choose the *siding performance* that's right for your project.

Check out Royal's 2013 lineup of vinyl siding and accessory products by visiting our website at royalbuildingproducts.com. Our siding product line is the most complete in the marketplace including a full range of standard and specialty performance products, backed by industry leading lifetime warranties.

IMPORTANT: FIRE SAFETY INFORMATION

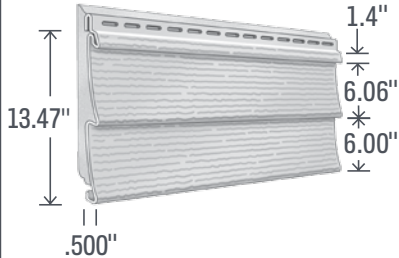

When rigid vinyl siding is exposed to significant heat or flame, the vinyl will soften, sag, melt or burn, and may thereby expose material underneath. Care must be exercised when selecting underlayment materials because many underlayment materials are made from organic materials that are combustible. You should ascertain the fire properties of underlayment materials prior to installation. All building materials should be installed in accordance with local, state and federal building code and fire regulations.

**D-VENT DETAILS
INTERIOR**

- Plenty of nailing slots
- Dual snaps at .75" and 1.25"
- Lid recesses into base to prevent bird/rodent entry when dryer is not running
- Deflection walls keep lint from getting behind paddle wheel
- Paddle wheel spins when dryer is running, discouraging bird/rodent entry and allowing lint to flow freely

TUBE CONNECTION

- 3"- long tube connection with 4.25" to 4" inside taper allows easy retrofit over existing tube
- Deeper taper for easy insertions of 4" metal tubes
- Snaps for tubes
- When remodeling, existing tubes may be left inside the wall - long tube with taper enables all connections to be done outside of home

*Consult the VSI website at www.vinylsiding.org for a current list of certified products.

Certified vinyl siding is siding that is verified by an independent process to meet or exceed ASTM D3679, the long-standing, accepted industry standard for quality vinyl siding. ASTM, the American Society for Testing and Materials, is one of the largest standards development systems in the world and has been developing technical standards for products for the past 100 years.

Many vinyl siding manufacturers have been working to meet or exceed the ASTM standard for years, but now through the VSI certification program, they can demonstrate to consumers that their products have achieved this mark of quality.
